Assignment Lec(2)

(1) Write a program to print the ASCII value of a character input by the user.

(2) Write a program that takes a number and a bit number from the user, then print the value of this bit in this number.

(3) Write a program that asks the user to enter a three-digit number, separates the number into its individual digits and prints the digits separated from one another by three spaces each. [Hint: Use combinations of integer division and the remainder operation.] For example, if the user types in 421, the program should print: 4   2   1
